

# Compost to Water™

## The Problem

- Food waste by weight is the third largest component of all waste generated and occupies 30% of landfill space.
- Governmental agencies estimate that nearly 32 million tons of food waste is disposed of annually at a cost of more than \$1 billion.

## The Answer is Compost to Water™!

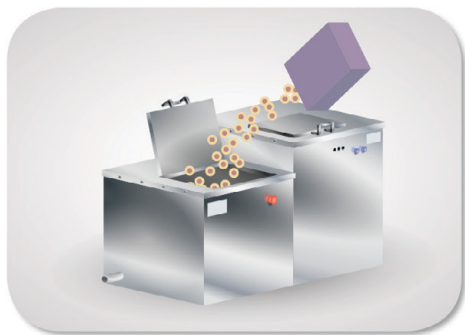

## Eliminate Your Food Waste Carting Costs

## The Solution

- **SunClean™ LLC** has developed the **Compost to Water™** system to revolutionize the disposal of food waste, based on the principle that waste should be dealt with at its source.
- As waste is generated, it is placed into the **Compost to Water™** unit, which completes the decomposition process automatically. There is no residual waste to remove.
- **Compost to Water™** is the only cost-effective, ecologically friendly, and sanitary solution to the world's growing food waste needs.

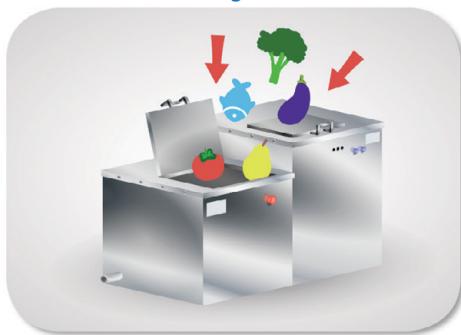

- **Compost to Water™** is a self-contained, mechanically controlled, continual feed system
- **Compost to Water™** is **Made in America** • **Compost to Water** is **Patent Pending** (# 12/076.677)
- **Compost to Water™** is safe for human and animal contact and is certified **Bio-Safety Level 1**.
- **Compost to Water™** uses a **"Bio-Helper"** microbial formula to rapidly consume organic material, leaving behind only a non-toxic, nutrient-rich liquid, suitable for discharge into public waste water disposal systems.

Annual Treatment

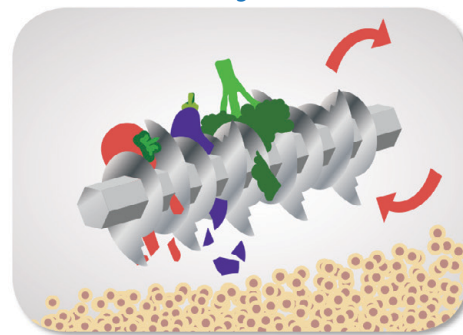

"Bio-Helper" microbial formula added

Stage 1

Food waste added

Stage 2

Shredder activated (optional)

Stage 3

Food waste mixed with microbes

Stage 4

Digestion and decomposition

Stage 5

Discharge in liquid form
