

# The Complete Suite of Patented Green Solutions

All Machines Feature a 5 Year / 60 Month Bumper-to-Bumper Warranty

## SunClean150™ Solar/Battery-Powered "Smart" Trash Compactor

Each SunClean150™ is both a bin and compactor in one. The SunClean150™ is solar/battery-powered – it is entirely off the grid – and sends text messages when it's full.

- Holds 150–200 gallons of trash – five times more trash than an ordinary trash can of the same size
- Powered by solar panels or battery
- Totally wireless; notifies personnel when full, so collection trips are only made when necessary
- Scratch resistant, rust-proof, made of rugged, durable recycled material
- Built to keep out pests, birds, rain
- Real time status of each unit can be accessed from any computer or smart phone with access to the web
- SunClean150's solar panels work, no matter the weather

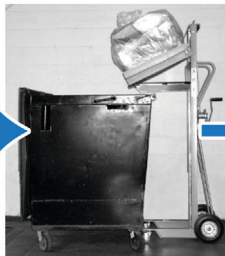

The SunClean150™ can be color-customized with your company's colors and decorated with ad panels and decals which can be used for ongoing public service announcements or promotions. Reports in real time to a web-based program/enhances labor efficiency.

- For indoor or outdoor use
- Reduces your labor costs by up to 80%
- Reduces your bag costs by up to 80%
- Reduces your carbon footprint by 80%

## SunClean 3-in-1™ Trash/Recycling Compactor/Cardboard Baler

The SunClean 3-in-1™ is the ultimate compacting solution for any small, medium, or large facility.

- Perfect for soil rooms
- Compacts waste, recyclable plastics, & corrugated boxes
- Built in twine-dispenser makes baling easy
- Easy-access bag storage space
- Includes rolling casters for easy movement
- Super strong – Compacts at 12,000 lbs of pressure
- Compacts materials at 20-1 ratio
- Reduces your labor costs 67%–90%
- Reduces your bag costs 67%–90%
- Reduces your carbon footprint 67%–90%
- Rolling load cart included with each building deployment
- Load cart lifts up to 600 lbs (181 KG) and raises up to 61"

## Compost to Water™ Eliminate Your Food Waste Carting Costs

The only cost-effective, ecologically friendly, & sanitary solution to the world's growing food waste needs.

- A self-contained, mechanically controlled, continual feed system
- As waste is generated, it is placed into the Compost to Water™ unit, which completes the decomposition process automatically. There is no residual waste to remove.
- Made in America
- Patent Pending (# 12/076.677)
- Safe for human and animal contact and is certified Bio-Safety Level 1.
- Uses a "Bio-Helper" microbial formula of non-toxic micro-organisms to rapidly consume organic material, leaving behind only a non-toxic, nutrient-rich liquid, suitable for discharge into public waste water disposal systems.

Annual Treatment

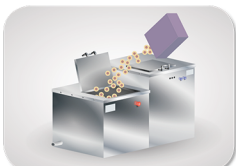

Stage 1

Stage 2

Stage 3

Stage 4

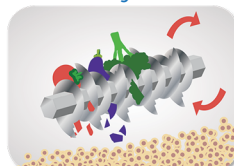

Stage 5

"Bio-Helper" microbial formula added

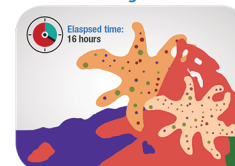

Food waste added

Shredder activated (optional)

Food waste mixed with microbes

Digestion and decomposition

Discharge in liquid form
